

INDIAN STATISTICAL INSTITUTE, BANGALORE CENTRE
B.MATH - First Year, First Semester, 2010-11
Probability Theory-I, Semestral Examination

1. Suppose X has the Geometric distribution with parameter p , $0 < p < 1$, and $Y|X = k$ has the discrete Uniform distribution on the set of integers, $-k \leq y \leq k$.
(a) Show that $E(Y^2) < \infty$.
(b) Find $E(Y)$ and $Var(Y)$. [10]

2. Let X be a continuous random variable with p.d.f.

$$f_X(x) = \begin{cases} \lambda \exp(-\lambda x) & \text{if } x > 0; \\ 0 & \text{otherwise,} \end{cases}$$

where $\lambda > 0$ is a constant. Define a discrete random variable Y by setting $Y = 0$ if $X < 1$ and for any integer $n \geq 1$, $Y = n$ if $n \leq X < n + 1$.

- (a) Find $E(X)$ and $Var(X)$.
(b) Find the probability distribution of Y .
(c) Find $E(Y)$ and $Var(Y)$. [15]

3. Suppose that the lifetime, X , of a randomly chosen electronic device of a particular type is a continuous random variable having the p.d.f.

$$f_X(x) = \begin{cases} \lambda \alpha \exp(-\lambda x^\alpha) x^{\alpha-1} & \text{if } x > 0; \\ 0 & \text{otherwise,} \end{cases}$$

where $\lambda > 0$ and $\alpha > 0$ are constants.

- (a) Find the p.d.f. of $Y = X^\alpha$.
(b) Find $P(X > 100)$ if $\lambda = 0.1$ and $\alpha = 0.5$. [10]

4. Suppose that IQ scores in a certain population can be modeled by the $N(\mu, \sigma^2)$ distribution. It is known that 126.6 is the 99th percentile score and 105.6 is the 90th percentile score. Find μ and σ^2 . [7]

5. Consider independently distributed random variables $X_1, X_2, \dots$, such that $X_i \sim \text{Binomial}(i, 1/3)$, $i = 1, 2, \dots$. Let $Y = \sum_{i=1}^{101} X_i$. Find a good approximation for $P(1689 \leq Y \leq 1765)$. [8]
